## AN INTRODUCTION

Established in 2006, Hammer LLC has proven to be a preferred business partner within the Power, Marine and Offshore market - meeting and exceeding the high demands from our customers and the market. With our customer's needs and expectations at our focus we have succeeded in setting and achieving various goals together.

Some of our main goals are:

- Quality and reliable products
- After sales service and continuous support
- Increase efficiency and operating time
- Optimize maintenance and decrease downtime
- Identify and eliminate safety risks

In order to further strengthen our position and to support our customers, we have opened our Abu Dhabi office in 2015, and very much look forward to be an active part in the exciting developments within this field.

## OUR PARTNER COMPANIES

---

IPU Group design and manufacture high quality engine starting, engine control, fuel and oil conditioning products for critical diesel and gas engine applications. Our engineered solutions provide reliability and confidence where you need it most – for power generation, the oil and gas industry, offshore and marine, industrial and off highway applications. By applying our knowledge and expertise we help you to be certain of your equipment productivity, performance and safety.

The IPU Fuel Conditioning division provides a complete range of products and services designed to detect and eradicate harmful diesel fuel contamination. The range includes products for bulk fuel storage, on application fuel system protection and mobile solutions.

### HVAC for oil & gas and energy industries

Halton Marine offers high-quality ventilation solutions for Oil & Gas, Energy and Shipbuilding industries. The companies track record includes over 200 offshore projects, over 150 cruise ships, over 150 navy ships and over 3000 standard ships. Halton Marine Oy's operations are certified according to ISO 9001, ISO 14001, OHSAS 18001 and the company is member of Achilles and FPAL.

The main product groups include but are not limited to: Ventilation fire safety, Blast protection, Room ventilation, Galley ventilation, Laboratory ventilation and Air intake solutions.

Halton operates today in over 30 countries around the world, with annual sales of 197MEUR and over 1400 employees.

The main field of interest has been in the offshore Oil & Gas Industry, where Anti Slip Solutions from Real Safety now have been implemented at almost every platform in the North Sea and in many other offshore facilities and vessels all over the world.

The increasing focus on safety has been a developing factor for Real Safety, as the former trading company since 2014 has been designing and manufacturing their own high quality anti slip systems. This culminating in achieving the first IMO certification within their field of business already in January 2015.

Step Covers, Ladder Rungs, GRP Gratings, Walkway Covers – all certified – have the same sublime combination of a high quality fibreglass

and the extremely hard wearing Silica stone fragments making the Anti Slip Systems from Denmark a long lasting and sound investment within modern and visionary Safety.

## HIPAQ

Pressure Systems

HIPAQ A/S has more than 30 years of experience as designer and manufacturer of customised high pressure pump and air compressor systems.

HIPAQ supplies high quality turnkey solutions used worldwide for offshore oil & gas, marine and industry.

HIPAQ supplies a wide range of high pressure systems with pneumatic, hydraulic, diesel driven and electric driven systems at 5 – 650 kW drive power and up to 3000 bar working pressure.

We have extensive experience with all offshore related standards such as NORSOK, API and DNV and major expertise in building explosion proof systems that comply with the ATEX directive for the offshore industry.

HIPAQ management system is certified by DNV to conform to ISO 9001, ISO 14001 and OHSAS 18001.

Our Product Range Includes:

- Air compressor packages
- Diesel driven zone 2 power packs
- Electric driven zone 1 power packs
- Triplex pump systems
- Chemical injection systems
- Flushing systems
- Hot water washers for zone 1
- High pressure cleaning systems

Littelfuse products help protect electrical equipment used in, mining, petrochem, and general industrial applications. Littelfuse offer a broad and reliable selection of fuses, fuse blocks, and protection relays to improve safety and reduce downtime. For decades, Littelfuse have worked with our distributor partners to help OEMs, electrical installers, design engineers and end-users select the right product for their applications.

Today, Littelfuse offers a broader range of products addressing protection and control needs while still

providing the same great service and support that customers have learned to expect.

Our product range include:

- Ground-Fault Protection
- Resistance Grounding / NGR Monitoring
- Motor and Pump Protection
- Feeder Protection
- Arc-Flash Protection

---

## SELCO

SELCO is a pioneer and well-known company within compact power stations, and their solutions are widely used in marine installations, oil rigs and onshore installations.

The key product segments:

- Power Management
- Engine Management
- Protection
- Alarm Systems

SELCO products carries type approvals from major marine classification societies and the company is ISO 9001 certified.

With the products proven reliability and the company's support beyond expectation, SELCO has successfully positioned them selves in the Middle East Market for the past decade.

## OUR VISION

To supply high quality and reliable solutions with local support and service – not just meeting but exceeding client expectations.

---

## OUR MISSION

To be a preferred business partner to our clients, within our field of expertise and thereby establish a long-term business relationship built on mutual trust, respect and integrity.
